PULIZIA E/O MANUTENZIONE

Prima di mettere in lavatrice, rimuovere gli eventuali sostegni rigidi asportabili, chiudere le fibbie e annodare i lacci per evitare danni durante i cicli di lavaggio e asciugatura. Allacciare le chiusure a strappo con Velcro prima del lavaggio, per evitare che vi accumulino pelucci e pelli di fibra. Per garantire la massima durata del prodotto ed evitare che cinghie o cinture si annodino, lavare all'interno di una retina da bucato per lavatrice. Lavare a mano o in lavatrice con acqua calda e un detergente per capi delicati a temperatura fino a 60°C / 140°F. Per l'uso di un candeggianti, seguire le istruzioni riportate sulla confezione. Non stirare. Stendere aperto e disteso e lasciare asciugare all'aria o asciugare a bassa temperatura in asciugatrice per un massimo di 40 minuti. Dopo il lavaggio, controllare il prodotto per verificare l'integrità e reinserirne gli eventuali sostegni precedentemente rimossi. Le chiusure a strappo con Velcro possono raccogliere pelucci dopo ripetuti utilizzi o lavaggi, riducendo la capacità di tenuta. Se necessario, usare una spazzola a setole dure per rimuovere i pelucci dal lato ruvido del Velcro. Verificare la forza di adesione del Velcro prima dell'uso e scaricare il prodotto se la chiusura non tiene. Durante il lavaggio, le fibbie in metallo potrebbero piegarsi e le fibbie in plastica a scagno rapido potrebbero rompersi. Prima di ogni utilizzo, assicurarsi sempre che tutte le fibbie siano in buon stato e non siano piegate, crepate o rotte. Qualora il prodotto risulti danneggiato, non utilizzarlo e sostituirlo con uno nuovo. I clienti devono considerare che i materiali in cotone possono subire un ritiro fino al 5% nell'arco di vita del prodotto.

REINIGING EN ONDERHOUD

Verwijder vóór u dit product uitwast alle afneembare, onbuigbare baleinen en maak alle gespen vast en bind alle touwtjes aan elkaar om beschadigingen tijdens het wassen en drogen te minimaliseren. Maak alle klittenbandbevestigingen vast voor u dit product uitwast, zodat er geen pluisjes aan hechten. Was dit product in een waszak van gaas om de maximale levensduur te garanderen en om te voorkomen dat riempjes verstrekken raken. Was het product handmatig of in de wasmachine met een mild wasmiddel. Zorg dat het water maximaal 60°C/140°F is. Bleek het product overeenkomstig de aanwijzingen op de verpakking. Dit product mag niet worden gestreng. Leg het product plat en open en laat het aan de lucht drogen. U kunt het product ook maximaal 40 minuten in een niet-warme cyclus in de wasdroger laten drogen. Controleer na het wassen of het product nog intact is en plaats de eerder verwijderde baleinen weer terug. Klittenband kan na herhaaldelijk gebruik of na een wasbeurt pluisjes aantrekken, waardoor het minder goed werkt. Verwijder zo nodig met een stijve borstel pluisjes van de kant met haakjes. Test het klittenband voor gebruik en verwijder het product als het klittenband niet goed meer werkt. Tijdens het wassen kunnen metalen gespen buigen. Plastische snelpolijpjes kunnen barsten of breken. Controleer voor gebruik altijd of alle gespen goed werken en niet zijn gebogen, gebart of gebroken. Als het product is beschadigd, dient u het product niet opnieuw te gebruiken maar te vervangen door een nieuw product. Klanten dienen er rekening mee te houden dat producten van katoen gedurende de levensduur maximaal 5% krimpen.

ЧИСТКА И/ИЛИ ТЕХНИЧЕСКОЕ ОБСЛУЖИВАНИЕ:

Перед стиркой снимите все отсоединяемые жесткие корсеты, застегните все пряжки и завяжите все шнурки, чтобы не допустить повреждения во время циклов стирки и сушки. Перед стиркой застегните все застежки с липучками, чтобы предотвратить прилипание и накопление ворса. Для обеспечения максимального срока службы и предотвращения спутывания ремней страйкайте в сечетом стиральным мешке. Подложите ручной или машинный стирок в теплой воде до 60°C (140°F) с использованием мягкотканывающего моющего средства для тканей. Отбеливание выполняется в соответствии с указаниями на упаковке. Запрещается гладить. Для естественной сушки положите изделие на ровную поверхность в развернутом виде. При сушке в сушильной машине используется пониженная температура в течение не более 40 минут. Осмотрите изделие после стирки, чтобы убедиться в отсутствии повреждений и установите все ранее снятые корсеты. После длительного использования или стирки на застежках с липучками может собираться ворс, что приводит к снижению силы фиксации. При необходимости используйте щетку с жесткой щетиной для устранения ворса с липкой стороны. Перед использованием проверьте схватываемые липучки и утилизируйте изделие, если липучка не обеспечивает надежную фиксацию. Во время стирки металлические пряжки могут потянуться, а пластиковые пряжки быстрого сброса могут треснуть или сломаться. Перед каждым использованием обязательно убедитесь, что все пряжки в хорошем рабочем состоянии, не погнуты, не треснуты и не поломаны. Поврежденное изделие запрещается использовать; его следует заменить новым. В течение срока службы изделия оканчивается усадка хлопчатобумажных материалов до 5%.

CLEANING AND/OR MAINTENANCE

Prior to washing, remove any detachable rigid stays, fasten any buckles and tie any laces to minimize damage during wash and dry cycles. Close any hook and loop fasteners before washing to help prevent lint build up and pilling. For maximum product life and to help prevent any straps from tangling, wash in a mesh laundry bag. Hand or machine-wash with a mild fabric detergent in warm water up to 60°C / 140°F. Bleach as directed on container. Do not iron. Lay flat and open and allow to air dry, or tumble dry on low heat for up to 40 minutes. Inspect the product after washing to ensure it is intact and replace any previously removed stays. Hook and loop fasteners may collect lint after repeated use of laundering, reducing grip strength. As needed, use a stiff-bristle brush to remove lint from the "hook" side. Test hook and loop adhesion before use and discard product if hook and loop does not hold securely. During the washing, metal buckles could bend and plastic quick-release buckles could crack or break. Always ensure that all buckles are in good working order and are not bent, cracked or broken before each use. If the product is damaged, do not use it and replace it with a new one. Customers could expect up to 5% shrinkage in cotton materials over the life of the product.
