Foam Heel Suspension Boot

- Smooth, breathable foam construction
- Sloped wedge is precisely placed inside boot to completely suspend the heel
- Ventilation holes help promote air circulation and dissipate heat
- Soft straps with D-ring/hook closures
- Posterior panel helps reduce friction against bed surface
- Extra foam block with adhesive can be attached to side of boot to help prevent foot rotation

Indications: Heel pressure injury prevention; Foot drop; Foot rotation

Description	Qty	Product #
Smooth, w/ Wedge	6/Case	M60-300

Ankle Contracture Boot

- Static ankle foot orthosis used for positioning and pressure reduction
- Structured to completely suspend the heel
- Available in foam or fleece material with or without boot sole
- Softgoods completely cover splint leaving no exposed metal against skin
- "No strap" closures make it easy for patients to apply and remove the boot
- Anti-rotation bar, padded toe piece and mesh laundry bag included
- Accessories include hip abduction bar, boot sole and extra softgoods
- Universal right/left

Indications: Hip rotation; Foot drop; Not recommended for severe plantar flexion contractures, open wounds, severe spasticity or thrombosis

DeRoyal®

PRUventor TurnPRO® System

SHEET

- Soft, strong, ergonomic handles for a comfortable and secure place to hold while turning and positioning the patient
- Breathable material allows moisture vapor and airflow through sheet
- Top handles on sheet for adjusting patient at head of bed
- Reinforced border handles offer strap stability and durability
- Labeling to assist in the proper use of the product
- Less friction for easy repositioning

ABSORBENT PAD

- Soft, breathable, moisture-managing top layer
- Quiet, non-slip back to keep pad in place
- Leakproof bottom layer to help prevent contamination of sheets
- Patented SuperCore® Technology provides premium absorbency and moisture wicking capabilities[1]

- **WEDGES**
- High-density foam accommodates varying patient weights
- Standard 30° angle supports off-loading the sacrum
- Fully covered wedges with high grip fabric to prevent migration
- Integrated positioning handles allow easy adjustment of the wedges
- Anti-slip top and bottom surface ensures wedge securement
- Easy-to-clean, wipeable surface on both top and bottom of wedges

Indications: To assist and maintain proper positioning of the patient while helping prevent sacral pressure injuries

DeRoyal® Quick-Release Tie Attachment

When using a restrictive device with tie straps, use the recommended quick-release tie steps found below for attachment. When securing quick-release ties to a bed frame, it is important to attach the straps to the movable portion of the bed frame- this is the part of the bed frame that moves up and down with the patient as the bed is adjusted. Never secure the straps to the bed rails and always attach them out of the patient's reach. Always follow your facility's protocol when utilzing any restrictive device. For more information, contact your local DeRoyal sales representative or call 888.938.7828.
