Product overview

Cheesecloth is an excellent choice for low-lint cleaning, polishing and food service applications. Many industrial, janitorial, and food service industries specify a cheesecloth fabric for their applications because of its unique combination of purity, softness, absorbency and strength.

CHEESECLOTH FEATURES

- 100% Cotton
- Bleached or Unbleached
- Variety of Weave Constructions
- Various Put-Ups Available (Boxes, Bolts, Wheel Cuts, Slitting)

CHEESECLOTH USES

- General Wiping/Cleaning
- Dusting
- Paint Straining
- Paint Application/Faux Painting
- Furniture Stain
- Application/Polishing
- Tile Polishing
- Cheese Making
- Wine Making
- Syrup/Jelly Making
- Craft Making
- Graphic Arts Applications

Product

overview

HERMITEX®

HERMITEX® is manufactured from 100% purified cotton fibers and contains no silicone. Its bright white, high quality, cotton fibers are low-lint and non-abrasive, yet strong enough to withstand industrial wiping and polishing operations utilizing strong solvents. The textured weave of HERMITEX® provides more surface area for trapping contaminants and moisture, resulting in absorbency of more than 400 times its dry weight in liquids.

HERMITEX® meets the following wiping cloth specifications: Qualified by Performance Review Institute (PRI) to meet or exceed SAE Specification AMS 3819, Class 1, Grade A, BMS 15-5G, CLASS A SPECIFICATION.

DOUBLE/ROLLED BOLTS

Multi-use 36-inch wide cheesecloth folded into a convenient bolt package. Packed 10 bolts per case. Double/Rolled bolts are offered in many bleached and unbleached weave constructions.

PACKAGE-READY CHEESECLOTH

Cheesecloth available in 2, 4, 5, and 10 yard packages. Packaged in clear polybags for easy display. Great for straining, basting, polishing and cleaning. Private label packaging is available. Packaged 144 packages per case.

ROLLED CLOTH

Multi-use greige and bleached fabrics available on small rolls. Roll lengths range from 50 to 500 yards.

JIFFY ROLL

JIFFY ROLL wipers are made from four layers of 100% cotton cheesecloth and contain no contaminants, silicone or chemical binders. JIFFY ROLL wipers provide a heavier, thicker, more absorbent wipe than HERMITEX®, and are excellent for use in sealant applications.

JIFFY ROLL meets the following wiping cloth specifications: Qualified by Performance Review Institute (PRI) to meet or exceed SAE Specification AMS 3819, Class 1, Grade A, BMS 15-5G, CLASS A SPECIFICATION.

GRAPHIC ARTS CHEESECLOTH

Graphic arts cheesecloth provides the proper absorbency for applying gum arabic and is the ideal product for applying a uniform, thin film of gum to an offset plate. It is not only soft and absorbent, but also will not scratch or scuff image areas. After the plate is gummed, graphic arts cheesecloth is excellent for buffing the plate to a dry, smooth and streak-free finish. Graphic arts cheesecloth will not leave lint or residue. Grade 40 and Grade 50 Boxes and Bolts.

IDEALFOLD

Cheesecloth packed in IDEALFOLD boxes provides convenient material access for end users involved in wiping, cleaning, painting and food preparation operations.
